## Reading and Interpreting Line Plots | 4 Categories

The line plot shows the number of flamingos, frogs, turtles, and ducks that Mary spots around the pond.

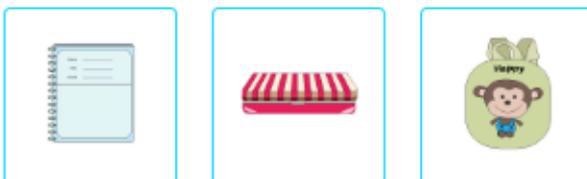

Which animal does Mary spot the most?

The line plot displays the number of backpacks, crayon boxes, pencil cases, and notebooks Ruby purchased for her children.

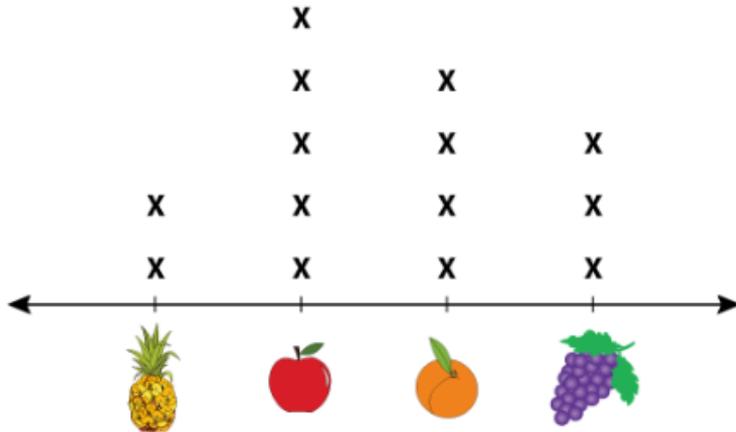

Which school supply did Ruby purchase the most?

The line plot displays the number of children in a class who preferred to eat fruit such as pineapple, apple, orange, and grapes.

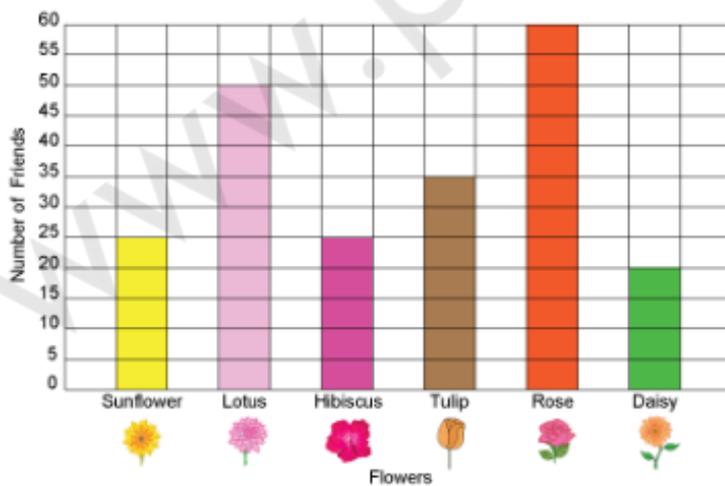

How many fewer children liked pineapple than those who liked orange?
